International Conference

Mothers and Social Movements in Postwar Japan

DIJ, 29.07.2016

Mothers often play an important role when it comes to social movements and political activism, in Japan and elsewhere (e.g. LeBlanc 1999, Dandachi 2015, Lieberfeld 2009, Edmonds-Cady 2009). Motherhood is seen as an important mobilizing factor for people to become active in social movements and protest activities. This is particularly true for activism in relation to environmental pollution (e.g. Minamata and Chernobyl), consumer issues, and food safety. Now with the triple disaster of March 11, 2011 having triggered a resurgence of social movements and protests in Japan, it is again mothers who have a large share within these movements. The academic interest in social movements and civil society has substantiated the importance of the role of mothers within them. Research is mostly conducted through small-scale, case study-type analyses. The studies however remain scattered throughout diverse publications and are theoretically diverse.

In this conference, we aim at bringing together several of the researchers who study mothers as activists in social movements in Japan, with a particular focus on, but not limited to, activism after 3/11. Our objective for this conference is threefold: (1) We provide an opportunity for discussing motherhood as a distinct category (and cause) in shaping activism in contemporary Japan. We aim to reassess and contextualize the phenomenon of motherhood and activism in light of the most recent developments post-3/11 and possibly also for future research for the Kumamoto/Aso region. (2) The conference combines different perspectives and disciplines for the study of motherhood in Japan, including historical aspects of mothers in movements during the 20th century, and providing three case studies of mother groups in the post-3/11 movements, discussing

issues such as motivations, strategies of action, framing and organization of mother's groups as well as political efficacy. (3) Beyond providing a platform for an in-depth conversation and networking among the participating scholars, this conference will also provide a foundation for a special issue on the topic of mothers, motherhood and social movements in Japan. Participants of the conference will be invited to contribute to this issue.

Welcome: Franz WALDENBERGER, DIJ

Roundtable

Governance and Financial Aspects of Catastrophic/Systemic Risks

DIJ, 08.09.2016

Aoyama Gakuin University, DIJ

In Japan, the probability of a mega-earthquake hitting dense agglomerations is very high. Like other large-scale natural disasters such events bear systemic risks, i.e. they can trigger disruptions endangering the stability of the social, economic and political order. Our roundtable looked at the implications of mega earthquakes for government finance, insurance industries and investor behaviour by way of macro-economic modelling as well as case studies from more recent major disasters. The first presentation gave a general overview about the nature of systemic risks and possible policy options.

Deutsch-Japanisches Symposium zu Klimaschutz und regionaler Entwicklung

Deutsches Kulturzentrum, Tokyo,
02.11.2016

Organisation: Botschaft der Bundesrepublik Deutschland,
Tokyo, DIJ, Waseda University – School of International Liberal Studies (SILS)

Mit freundlicher Unterstützung durch das Goethe-Institut Tokyo und das Ministry of the Environment, Government of Japan

Deutschland und Japan haben auf dem G7-Treffen der Umweltminister und mit der im Mai 2016 unterzeichneten gemeinsamen Erklärung zwischen dem deutschen Bundesministerium für Umwelt, Naturschutz, Bau und Reaktorsicherheit und dem Ministry of the Environment, Government of Japan ihrer Entschlossenheit zu einer intensiven Zusammenarbeit im Bereich des Klimaschutzes Ausdruck verliehen.

Klimaschutzpolitik muss weltweit koordiniert werden, die konkrete Umsetzung hängt allerdings in vielen Fällen vom Engagement der Kommunen und ihrer Bürger ab. Das Symposium ging auf die wichtige Rolle der Zivilgesellschaft bei der Umsetzung und Entwicklung von Klimaschutzmaßnahmen in Deutschland und Japan ein. Ziel war der Austausch von Informationen über Ausmaß, Reichweite und Wirkung lokaler Projekte, um Unterschiede und Gemeinsamkeiten besser zu verstehen und das gegenseitige Lernen zu unterstützen.

Mehr denn je sind Austausch und Verfügbarkeit von Daten von besonderer Bedeutung. Das Deutsche Institut für Japanstudien erstellt in Zusammenarbeit mit der Waseda University und mit Unterstützung der Deutschen Botschaft Tokyo eine Datenbank über lokale Klimaschutzprojekte in Japan. Das Projekt und erste Ergebnisse wurden auf dem Symposium vorgestellt. Das Ministry of the Environment hat ebenfalls ein Projekt lanciert, das die Zusammenarbeit zwischen Deutschland und Japan auf kommunaler Ebene unterstützt, um den Wandel zu einer „klimaneutralen Gesellschaft“ zu erreichen.

Begrüßung

Franz WALDENBERGER, DIJ

Hans Carl VON WERTHERN, Botschafter der Bundesrepublik Deutschland

The Relevance of Area Studies for the Sciences and Public Policy: Examples from Europe & Asia
The University of Tokyo, Hongo Campus, Sanjo Kaikan, 15.11.2016

Organisation: GIGA German Institute of Global and Area Studies, Hamburg, DIJ, The University of Tokyo, Network for Education and Research on Asia (ASNET), Institute for Advanced Studies on Asia (IASA)

Mit freundlicher Unterstützung durch: Friedrich-Ebert-Stiftung, Japanisch-Deutsches Zentrum Berlin, Leibniz-Gemeinschaft, Relational Studies on Global Crisis (JSPS Grant-in-Aid Project)

Social sciences, and even more so natural sciences and engineering, tend to neglect local conditions, i.e. how ecological, social, political or economic issues are perceived and addressed in the specific context of a country or region and how solutions are sought for and implemented. Area studies can correct these shortcomings, because they pay close attention to local conditions and regional differences. Nevertheless, it is far from common practice that area studies specialists and researchers from other sciences collaborate.

Our conference aimed at highlighting possible contributions of area studies to the sciences, innovation and public policy by discussing concrete examples in highly relevant thematic fields. For the public part of our conference which referred to the outcomes of our preceding "closed" sessions everybody was invited.

Welcome Addresses:

Masashi HANEDA, The University of Tokyo, Vice President
Patrick KÖLLNER, GIGA Institute of Asian Studies, Director

Keynotes – Area Studies, Innovation and Public Policy in Europe and Asia

Does Location Matter for Designing Science and Innovation Policy?
Yuko HARAYAMA, CSTI, Cabinet Office Japan, Executive Member

WeberWorldCafé: Diversity – Limits and Opportunities

Universität Göttingen, Alte Mensa, 24.11.2016

Organisiert von: Max Weber Stiftung – Deutsche Geisteswissenschaftliche Institute im Ausland; DIJ (Phoebe Holdgrün); Forum Transregionale Studien Berlin; Institut für Diversitätsforschung, Georg-August-Universität Göttingen; Max-Planck-Institut zur Erforschung multireligiöser und multiethnischer Gesellschaften (MPIIMM)

Was ist „Diversity“? Bedeutet Vielfalt eine Bereicherung für menschliches Zusammenleben oder führt sie zu Ausgrenzung? Wie gehen Politik und Bildungseinrichtungen international mit Diversität um? Welche Vorstellungen von Gender, Elternschaft und Sexualität bestimmen die Normen in unterschiedlichen Weltregionen? Wie reagieren Städte auf soziale Mobilität und Gentrifizierung und welche Konzepte entwickeln sie? Fördert mehr Diversität am Arbeitsplatz Innovation – oder entstehen dadurch Konflikte?

Berichte von der Veranstaltung finden Sie hier: <https://wwc.hypotheses.org/author/maxweberstiftung>

Im Vorspann dazu fand am 23.11.2016 in der *Reihe Geisteswissenschaften im Dialog* eine Podiumsdiskussion *Zum Anschauen: (Ge)schlecht konstruiert? Gender und Identität aus transregionaler Perspektive* statt. Ronald Saladin diskutierte mit. Die Diskussion steht hier <http://www.geisteswissenschaft-im-dialog.de/startseite.html> als Video zur Verfügung.

Global Business Law Seminar

Corporate Governance – Comparing Japan and Germany

Hitotsubashi University, 26.11.2016

Organisation: Hitotsubashi University, Graduate School of International Corporate Strategy; DIJ

Japan's system of corporate governance is presently undergoing profound changes. Corporate governance research has mainly focused on comparisons with the US and the UK, but there is yet another successful capitalist model, namely Germany. Germany's system of corporate governance also underwent great changes especially after the so-called Schroeder reforms. A comparison with Germany will provide a new

perspective on the ongoing discussions about corporate governance reform in Japan.

The three sessions of the symposium covered 1. shareholders, 2. employees, and 3. boards. In each session one expert on the German and the Japanese side delivered a presentation followed by short Q&A. A panel discussion undertaking an overall comparison of the two systems concluded the symposium.

Opening Remark

Franz WALDENBERGER, DIJ

Keynote Speech

Zenichi SHISHIDO, Hitotsubashi University, Graduate School of International Corporate Strategy

Roundtable

Effects of Zero Interest Rate Monetary Policy on Banks and Society

DIJ, 30.11.2016

Institut für Wirtschaftspolitik, Universität Leipzig, DIJ

In Japan, zero interest rate monetary policy and unconventional easing measures have prevailed for almost two decades. It is possible that these policies have had incisive side-effects aside from effects on inflation (expectations). Our roundtable focused on the implications of these measures for banks and society by way of macro-economic theory as well as empirical evidence.
